General Instructions for Project

- All the parts of the questions have to be solved.
- A detailed report with abstract, Introduction, Methodology, Experiments and Results, Conclusion and References has to be submitted.
- The projects need to be presented. PPT has to be created.
- The work can be done as a group but the evaluation will be for individual. Each student should have a valid contribution to get minimum mark.
- All the codes along with the report and presentation has to be submitted as a zip file.
- A readme.txt file has to include which gives the detailed instructions to run the code. It should also include all the dependencies to install if any.
- Work done, Report, Presentation, Slides, team work and individual contribution will have separate weightage.
